SUMMARY

Full-Stack Developer with 5 years of experience.

EXPERIENCE

Full Stack Developer – Product

Nelson Education

April 2026 – Present, Toronto, ON | Hybrid

- Develop and maintain microservices using Go, Protobuf, and MongoDB within an AWS environment.
- Build front-end features using React, Redux-Saga, and GraphQL (Apollo).
- Utilize Docker and Istio for service orchestration and Kibana for system monitoring.
- Collaborate with the product team to transition core content features into scalable engineering solutions.

Web Developer – R&D

Nelson Education

October 2025 – April 2026, Toronto, ON | Hybrid

- Develop and maintain web applications using JavaScript (ES6+), HTML, CSS, and modern frameworks such as React.
- Build and integrate front-end and back-end functionality using Node.js, version control with Git, and cloud platforms including AWS (infrastructure), Azure (neural speech), and GCP (Firebase).
- Collaborate with cross-functional teams to gather requirements, iterate on features, and deliver scalable, user-focused solutions.

Digital Content Developer

Nelson Education

March 2024 – September 2025, Toronto, ON | Hybrid

- Design, develop, and adapt engaging, accessible HTML and multimedia content by collaborating with cross-functional teams to manage end-to-end production from requirement gathering through quality assurance and launch.

Web Developer

Sylogist

May 2022 – July 2023, Barrie, ON | Remote

- Integrate Microsoft Dynamics CRM with proprietary and third-party Content Management Systems (CMS) to create seamless and functional user-facing portals.
- Develop and implement front-end components and user interfaces based on technical specifications, wireframes, and user stories using modern web technologies.
- Analyze and apply performance enhancements and code optimizations to reduce application loading times and improve the overall user experience.

Freelance Web Developer

Destinade

June 2020 – May 2022, North York, ON | Hybrid

- Develop and maintain travel management software.
- Implement new features, test, and debug the software.

Junior Web Developer

Gri Creative

June 2019 – May 2020, Kadiköy, İstanbul | On-Site

- Apply custom layouts to existing portals and fix bugs.
- Collaborate closely with senior developers to understand requirements and design specifications.
- Use HTML, CSS, and JavaScript skills to create visually appealing and functional layouts.
- Participate in code reviews with colleagues to ensure the quality and consistency of the codebase.

CERTIFICATIONS

Certified ScrumMaster® (CSM)

Scrum Alliance • 2025

- Professional certification in Scrum methodology, demonstrating knowledge and ability to facilitate and guide Scrum teams.

Microsoft Certified: Azure Fundamentals

Microsoft • 2023

- Validation of foundational knowledge of cloud services and how those services are provided with Microsoft Azure.
-

PROJECT

Alt Text Generator

Nelson Education

- Overview: A web application designed to automate the generation of alt text for images, which enhances accessibility and streamlines content workflows.
- Automation: Integrates with ATG and Nellie-Backend to analyze images and automatically generate descriptive alt text.
- Reporting and Distribution: Generates PDF and Excel reports for easy review by editors, with an automated email distribution system for more efficient access.
- Data Import: Implements alt text data import features to improve data management and overall workflow efficiency.
- Efficiency: Reduces the alt text and visual description creation process from a 4-week timeframe to just 1 week.

Nellie - Productivity Wizard

Nelson Education • marketplace.visualstudio.com/items?itemName=Destinade.nellie

- Core Automation: Engineered an automation suite utilizing OpenAI, Google Cloud Vision, and AWS to cut manual workloads by 30%.
- Error Mitigation: Built automated validation workflows that reduced editorial and compliance errors by 30% within three months.
- Efficiency & Analytics: Saved 25% of time spent on editorial tasks within six months; integrated AWS CloudWatch for user engagement analytics.
- UI Modernization: Designed an accessible v1.3.0 interface to onboard non-technical users, driving an 80% adoption rate in one month.

EDUCATION

Software Engineering Technology - AI

Centennial College • Scarborough • 2025 • 3.92

Software Engineering Technician

Centennial College • Scarborough, ON • 2022 • 3.48

- Awarded Honour's Diploma
- CCSAI Excellence in Academics and Leadership Scholarship

INVOLVEMENT

Volunteer Event Technician

Ottawa, ON • Federation for the Humanities and Social Sciences • June 2022 - June 2022

- Assisted presenters with equipment setup and conducting test runs.
- Throughout the presentations, I intervened if either the presenter or a significant portion of the audience faced technical issues.
- Maintained attendance records and reported the specifics of any technical issues encountered.

SKILLS

Cloud & Infrastructure: AWS (EC2, Lambda, S3, CloudFormation), Docker, Istio, CI/CD, Kibana

Frontend: React, Next.js, Redux-Saga, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS/SCSS, Material-UI, Tailwind CSS

Backend & APIs: Node.js, Go (Golang), Protobuf, Express, RESTful APIs, GraphQL (Apollo), MongoDB, PostgreSQL, MySQL, Redis, Microservices

AI, ML & Cloud Services: OpenAI API, Google Cloud Vision (GCP), Azure (Neural Speech), Firebase, Microsoft Cognitive Services, NLP, Python, TensorFlow

Tools & Methodologies: Git, GitHub, Jest, Playwright, VS Code, Agile, Scrum, Code Review

Professional & Compliance: Cross-Functional Collaboration, Technical Documentation, Troubleshooting & Debugging, WCAG Compliance, Results-Driven Approach
